

## **Britt Greenland, Greenland Fine Art**

*"It's a response to the fullness of life that causes me to paint a wide variety of subjects, expressing my wonder about each one."*

Britt launched into her art passion as an oil painter, but creativity is not easily contained, and for Britt it spilled over into painting in soft pastels and designing jewelry.

Her jewelry making is a multiple step labor of love. She starts with inspiration from vintage filigree jewelry findings and makes her own original texture molds from there. You might think that the pieces are glass or ceramic, but the base layer of the pieces are carefully designed and crafted polymer clay.

Her vibrant pastel paintings are imbued with her love of light and life. Rather than the list of juried shows and galleries her work has been in, Britt feels the true rewards of the artistic life are the letters of heart-felt thanks for commissioned artwork or the simple joy of standing in front of a fresh canvas or jewelry components with fear and hope and just going for it!
